

## Walmart Recruiting - Store Sales Forecasting

Use historical markdown data to predict store sales

690 teams · 5 years ago

Overview Data Notebooks Discussion Leaderboard Rules Team My Submissions Late Submission

### **Data Description**

You are provided with historical sales data for 45 Walmart stores located in different regions. Each store contains a number of departments, and you are tasked with predicting the department-wide sales for each store.

In addition, Walmart runs several promotional markdown events throughout the year. These markdowns precede prominent holidays, the four largest of which are the Super Bowl, Labor Day, Thanksgiving, and Christmas. The weeks including these holidays are weighted five times higher in the evaluation than non-holiday weeks. Part of the challenge presented by this competition is modeling the effects of markdowns on these holiday weeks in the absence of complete/ideal historical data.

#### stores.csv

This file contains anonymized information about the 45 stores, indicating the type and size of store.

#### train.csv

This is the historical training data, which covers to 2010-02-05 to 2012-11-01. Within this file you will find the following fields:

- · Store the store number
- Dept the department number
- Date the week
- Weekly\_Sales sales for the given department in the given store

• IsHoliday - whether the week is a special holiday week

#### test.csv

This file is identical to train.csv, except we have withheld the weekly sales. You must predict the sales for each triplet of store, department, and date in this file.

#### features.csv

This file contains additional data related to the store, department, and regional activity for the given dates. It contains the following fields:

- · Store the store number
- Date the week
- Temperature average temperature in the region
- · Fuel\_Price cost of fuel in the region
- MarkDown1-5 anonymized data related to promotional markdowns that Walmart is running. MarkDown data is only available after Nov 2011, and is not available for all stores all the time. Any missing value is marked with an NA.
- CPI the consumer price index
- Unemployment the unemployment rate
- IsHoliday whether the week is a special holiday week

For convenience, the four holidays fall within the following weeks in the dataset (not all holidays are in the data):

Super Bowl: 12-Feb-10, 11-Feb-11, 10-Feb-12, 8-Feb-13 Labor Day: 10-Sep-10, 9-Sep-11, 7-Sep-12, 6-Sep-13

Thanksgiving: 26-Nov-10, 25-Nov-11, 23-Nov-12, 29-Nov-13 Christmas: 31-Dec-10, 30-Dec-11, 28-Dec-12, 27-Dec-13
